January 8, 2018

MEMORANDUM FOR THE EXECUTIVE DIRECTOR, FEDERAL ENERGY  
REGULATORY COMMISSION

*Sarah B. Nelson*

FROM: Sarah B. Nelson  
Assistant Inspector General  
for Audits and Administration  
Office of Inspector General

SUBJECT: INFORMATION: Management Letter on the Federal Energy  
Regulatory Commission's Fiscal Year 2017 Financial Statement Audit

The attached letter presents the results of the independent certified public accountants' consideration of the Federal Energy Regulatory Commission's (Commission) internal control over financial reporting during the Commission's Fiscal Year 2017 Financial Statement Audit. The letter contains one prior year finding that was reissued during the course of the audit. Management partially concurred with the finding and recommendations in the Management Letter. Management's comments are included with the finding.

To fulfill the Office of Inspector General's audit responsibilities, we contracted with the independent public accounting firm of KPMG LLP to conduct the audit, subject to our review. KPMG LLP is responsible for expressing an opinion on the Commission's financial statements and reporting on applicable internal controls and compliance with laws and regulations. The Office of Inspector General monitored audit progress and reviewed the audit report and related documentation. This review disclosed no instances where KPMG LLP did not comply, in all material respects, with generally accepted Government auditing standards. The Office of Inspector General did not express an independent opinion on the Commission's financial statements.

We appreciate the cooperation of your staff during the audit.

Federal Energy Regulatory Commission, and  
Principal Deputy Inspector General, United States Department of Energy

Ladies and Gentlemen:

In planning and performing our audit of the financial statements of the Federal Energy Regulatory Commission (the Commission or FERC), as of and for the years ended September 30, 2017 and 2016, in accordance with auditing standards generally accepted in the United States of America, we considered the Commission's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements but not for the purpose of expressing an opinion on the effectiveness of the Commission's internal control. Accordingly, we do not express an opinion on the effectiveness of the Commission's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. During our audit we noted a matter involving internal control that is presented for your consideration. This comment and recommendations, all of which have been discussed with the appropriate members of management, are intended to improve internal control or results in other operating efficiencies and are summarized in Exhibit A.

Our audit procedures are designed primarily to enable us to form an opinion on the financial statements, and therefore may not bring to light all weaknesses in policies or procedures that may exist. We aim, however, to use our knowledge of the Commission's organization gained during our work to make comments and suggestions that we hope will be useful to you.

The Commission's response to our communication of the deficiency identified in our audit is described in Exhibit A. The Commission's response to our finding and recommendations has not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

We would be pleased to discuss this comment and recommendations with you at any time.

This communication is intended solely to describe the comments and recommendations intended to improve internal control or result in other operating efficiencies. Accordingly, this letter is not suitable for any other purpose.

Very truly yours,

**KPMG LLP**

## STATUS OF PRIOR YEAR FINDINGS AND RECOMMENDATIONS

### Accounting for Capital Leases (Finding 16-FERC-04)

#### **Background:**

The Federal Energy Regulatory Commission (Commission) entered into a 5-year, lease-to-own contract for the network modernization capital project during fiscal year 2016. The lease was for one base year and four option years. If the Commission chooses not to exercise an option, the equipment will be returned. Otherwise, the Commission will own the equipment at the end of the lease.

#### **Criteria:**

Office of Management and Budget (OMB) Circular A-11, *Preparation, Submission, and Execution of the Budget*, Appendix B, provides instructions on the budgetary treatment of lease-purchases and leases of capital assets consistent with the scorekeeping rule developed by the executive and legislative branches in connection with the *Budget Enforcement Act of 1990*. The scorekeeping rule focuses on leases and lease-purchases specifically authorized by law. However, these requirements apply to all lease-purchase arrangements and capital leases, including those arrangements that agencies may enter into under existing general legal authorities and arrangements that are financed through the Federal Financing Bank.

Specifically, Section 1(a) states that "When an agency is authorized to enter into a lease-purchase or capital lease contract, budget authority will be scored in the year in which the authority is first made available in the amount of the net present value of the Government's total estimated legal obligations over the life of the contract." Further, Section 1(d) states that "When the lease agreement contains an option to renew that can be exercised without additional legislation, it will be presumed that the option will be exercised for purposes of calculating the term of the lease and scoring budget authority."

#### **Condition:**

During the Commission's discussion and analysis of how to account for the capital lease, management used OMB Circular A-11, Appendix B, to evaluate whether the lease should be scored. Upon not meeting any of the specific scoring criteria, management determined that the guidance did not otherwise apply to the requirements, including fully funding the lease at the beginning of the lease term. As such, only the base year was obligated during fiscal year 2016 instead of the total estimated obligations over the life of the contract, including all option years. The second option year was obligated during fiscal year 2017, leaving the final three estimated option years unobligated as of September 30, 2017.

#### **Cause:**

The issue identified occurred because management did not appropriately apply guidance from OMB Circular A-11, Appendix B, when obligating the capital lease.

#### **Effect:**

We determined that the current year obligation was understated by the amount of remaining option years of the contract, approximately \$2.9 million. In addition, the liability for the unfunded portion (account 299000) was overstated in the financial statements by approximately \$1.9 million and the capital lease liability (account 294000) was understated by the same amount.

***Recommendations:***

We recommend that the Federal Energy Regulatory Commission's Chief Financial Officer work with appropriate personnel to:

1. Document discussions and decisions made around unusual accounting situations and underlying transactions, including the considerations made and guidance used to reach conclusions; and
2. Discuss ambiguous guidance or other matters dealing with budgetary authority with the Office of General Counsel prior to entering into contracts.

***Management Response:***

Management believes that it properly followed the guidance in OMB Circular A-11, Appendix B, and properly accounted for the capital lease. Per OMB Circular A-11, Appendix B, and Appropriation Law, management believes the Commission is required to fund upfront the minimum lease payments required under the lease. Management believes this amount would equal the cancellation clause amount, which is what the Commission funded. The Commission's legal counsel agreed with management's interpretation of OMB Circular A-11, Appendix B, and the amount of funding required for the capital lease. The Accounting Officer does engage Commission counsel prior to making decisions on policy that involves appropriation law.

## **FEEDBACK**

The Office of Inspector General has a continuing interest in improving the usefulness of its products. We aim to make our reports as responsive as possible and ask you to consider sharing your thoughts with us.

Please send your comments, suggestions, and feedback to [OIG.Reports@hq.doe.gov](mailto:OIG.Reports@hq.doe.gov) and include your name, contact information, and the report number. You may also mail comments to us:
